My dear Steindroff,

I need a facsimile full size
of Cme 2603 at Leipzig (from Amibe).
I have copied it from the photograph
you kindly sent me years ago,
and if you could give me the
true size I could have it enlarged.
Or else you could send me a paper
squeeze (Abtclatsch).

Could you get some one to answer
the queries written on the enclosed
tracing? I should be very thankful
if you could.

It is pretty plain that the owner
is the same as he of Daresay
Cme 293. There too the names are

not perfectly clear. I read them

would then in the name?  would have a parallel in  77.

It is evident that A. was buried in Thebes - I think the Klebsch - but may have set up some sort of cenotaph in Amibet. If  is correct even the Egyptian is    ?

I leave here on Oct. 19 for Egypt. The plates of Paldemire are ready for the printers with few exceptions so I am a little lighter of heart.

I hope your winter will pass pleasantly and will cool Hitler's head a little
With best regards to Fran Steindl
Yours every
H. de S. Daries
