

PHYSICS 5383

Introduction to Quantum Mechanics SPRING 2020

- INSTRUCTOR Roberto Vega
Office: 105 FS (office hours by appointment)
email: rvega@smu.edu
Telephone: 214-768-2498
- TEXT *Introduction to Quantum Mechanics* by David Griffiths.
- GRADING The final course grade will be determined as follows. Homework 50%, exams 25%, final exam 25%. Exam dates as in syllabus.
- HOMEWORK Although homework is graded you are encouraged to help each other out and discuss the problems among yourselves. However, everyone should do their write-up individually. You will learn physics more effectively through discussion. Late homework will be subject to a 3 percentage point penalty for each day late.

Objectives:

The overall objective of the course is to provide a general introduction to the basic principles of quantum mechanics. This includes the discussion of approximation methods to analyze more realistic problems in Quantum Mechanics. The emphasis of this second part of the introductory course will be on applications of the basic principles. Please see [syllabus](#) for detail schedule.

Learning Outcomes:

Upon completion of this course students should be able to:

- have a good understanding of the principles of Quantum Mechanics
- determine when to use, and how to apply, approximation methods to solve the Schrodinger equation in one, two, or three dimensions for simple potentials.
- use the Born approximation to compute a cross section for scattering off a simple potential.
- be able to use the Clebsch-Gordan coefficients tables to combine two angular momentum states.

Final Exam:

The Final Exam will be as scheduled in the registrar's [website](#) on the 7th of May 8:00-11:00 am.

Attendance:

A student who is absent from class without valid reason for two consecutive weeks will be administratively dropped from the class by the instructor.

The Usual Disclaimers

- **Disability Accommodations:** Students needing academic accommodations for a disability must first register with Disability Accommodations & Success Strategies (DASS). Students can call 214-768-1470 or visit <http://www.smu.edu/Provost/ALEC/DASS> to begin the process. Once registered, students should then schedule an appointment with the professor as early in the semester as possible, present a DASS Accommodation Letter, and make appropriate arrangements. Please note that accommodations are not retroactive and require advance notice to implement.
- **Religious Observance:** Religiously observant students wishing to be absent on holidays that require missing class should notify their professors in writing at the beginning of the semester, and should discuss with them, in advance, acceptable ways of making up any work missed because of the absence. (See University Policy No. 1.9.)
- **Excused Absences for University Extracurricular Activities:** Students participating in an officially sanctioned, scheduled University extracurricular activity should be given the opportunity to make up class assignments or other graded assignments missed as a result of their participation. It is the responsibility of the student to make arrangements with the instructor prior to any missed scheduled examination or other missed assignment for making up the work.
